

# What's Involved in Being a Sentelligent Medical Intuitive and How You Can Become One

By Stacey Mayo

There are different kinds of medical intuitives. Basically, Sentelligent Medical Intuitives intuit what is keeping the body from healing itself. It can be emotional, physical, mental or spiritual.

They tap in and determine the patterns underneath illness, which will reoccur unless they are released and resolved. They also intuit nutritional deficiencies and diets and how to remedy them.

Intuit means to know or sense immediately without the use of reasoning.

Some medical intuitives tell you what kind of doctor to see or what types of medications are needed. Others go inside the body to see what is going on. Sentelligent Medical Intuitives do it differently. They believe in complementary medicine but focus on getting at the core of what is making you sick.

We are all born Sentelligent. This is a word coined by Stacey Mayo which refers to our ability to tap in to all 5 senses, our intuition, our feelings and something greater than ourselves - also known as Spirit, God or Source.

To be Sentelligent means to learn to listen to your body, the words you speak, the nudges you get and what happens easily.

When you meditate, you can hear your intuition more easily and access higher information as your mind chatter is quieter and you can hear the truth more easily. Whether you meditate regularly or not, doing The One Minute Meditation(tm) several times a day can help in many ways.

Everyone is intuitive and can access higher levels of information both from meditating and by getting attuned to Reiki which is universal energy. Both are important. Mayo has created a sentelligent attunement which takes you from your current level of accessing source information to the level which is appropriate for you.

Those who are medical intuitives care about health and wellness. Often they've had their own health challenges, which make them more passionate about helping themselves and others in a way that is permanent -- without a lot of drugs or surgery.

Medication can help a great deal but also may cause side effects. You may feel better but if the underlying cause is not released, then you will likely face that challenge again in your body, in your life or both.

Anyone can become a Sentelligent Medical Intuitive if they so desire. It is a great way to complement your current career or start a new one. Many people change careers several times during their life; when they have a yearning to do something more fulfilling that also earns them money.

Mayo has taught people who are changing careers, health coaches, massage therapists, energy practitioners, Theta healers, bio-feedback specialists and many other alternative practitioners to be medical intuitives. They add this service to their current practice so they can help their patients and themselves even more.

Bio:

Stacey Mayo is founder of The Sentelligent Solution, creator of the Sentelligent Medical Intuitive Certification Program, The C.A.S.H Grid, the One Minute Meditation and author of the award-winning book, "I Can't Believe I Get Paid To Do This!". She is also a Master Coach and Career Intuitive. Learn more about becoming a Certified Sentelligent Medical Intuitive at <http://theSentelligentSolution.com/smi>
